

## DBMS Lab (CS3120) Assignment – 9

### LAMP (Linux, Apache, MariaDB, PHP) Stack

#### Instructions:

1. Use the 'university' database.
2. The code should be well documented.
3. Submit two PHP scripts and a report (named *name\_roll\_no\_assignment\_9.pdf*) containing screenshots of the results obtained when the scripts are executed. The screenshot should contain the address bar of the browser. Refer the sample screenshot below:

#### Tasks:

1. Install the LAMP stack.
2. Write two PHP scripts:
  1. 'student.php': Prints the contents of the 'student' table.
  2. 'dept\_low\_budget.php': Prints the names of the departments with a budget less than 85000.
