

CS3120 Database Management Systems Lab
Project Task – 6

Instructions:

1. Name the report as *roll_no_team_no_task6.pdf*

Task:

1. Convert your project into a webapp with a 3-tier (presentation, application and database) architecture. MariaDB should be used as the database server. No restriction on the technologies (programming languages, web app frameworks) that may constitute the other layers.
2. Submit a report explaining the technologies used, why they were chosen, how they interact with each other and the challenges (if any) faced during implementation. Also include a couple of screenshots showing the webapp in action. Eg:- Patient registration, billing interface etc.
